

CSW ASV Solution

Introduction

The PCI Security Standards Council recognizes CSW as an Approved Scanning Vendor (ASV). As a PCI-ASV certified company, CSW assists enterprises meet their quarterly PCI requirements. Our service will help your organisation identify, and manage the security risks. Our ASV experts will evaluate the security of the systems that store payment account data. CSW's PCI approved scan solution helps clients achieve compliance via a streamlined process.

Quick remediation of threats

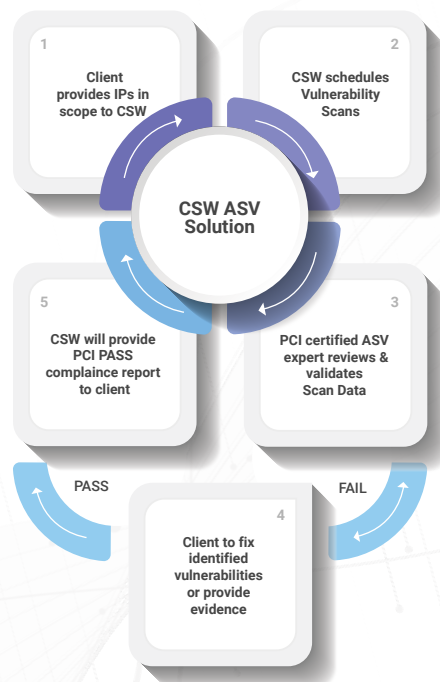

PCI DSS requires businesses to perform a network security scan once every 90 days on all internet-facing networks and systems. To achieve compliance, businesses must identify and remediate all critical, high and medium vulnerabilities detected during the quarterly scan. CSW will provide you the detailed remediation instruction to eliminate security threats.

- CSW's automation greatly simplifies scanning and remediation;
- CSW provides easy-to-use compliance and technical reports to clients;
- CSW uses the Qualys Cloud Platform to accurately scan for vulnerabilities;
- CSW provides detailed instructions for each detected vulnerability, with links to verified patches for rapid remediation.

Value Added Services

- A dedicated client portal for viewing discovered vulnerabilities and detailed remediation information
- Client need not invest in scan software, CSW has the required licenses
- CSW automatically completes quarterly scans
- Avail unlimited re-scans as often as clients wish in an ad hoc manner for identifying, remediating vulnerabilities and hence achieve PCI compliance
- Client can request scans in segments and remediate vulnerabilities against specific target IPs. No need to scan your entire network
- Leverage email support for understanding and pursuing compliance
- An intuitive easy step-by-step approach for compliance tips in a user-friendly interface.

Our Approach

Benefits

- Work directly with an approved scanning vendor
- CSW produces reports that conform to PCI's standards
- CSW's scan solution does not interfere with cardholder data
- We will not install any software in client's environment without prior approvals CSW will not conduct tests that overload the systems or cause an outage

Deliverables

CSW generates two types of PCI reports that are similar but intended for different purposes: One for proof of compliance, and the other to serve as a remediation guide.

- Generate a PCI Executive Report for the acquiring bank.
- Generate a PCI Technical Report listing the prioritized vulnerabilities for remediation. This report lists the technical details that assist in remediation.
- Includes an overall PCI compliance status as "PASSED" or "FAILED"
- An overall PCI compliance status of "PASSED" indicates that all hosts in the report passed the PCI DSS compliance standards set by the PCI Council. A host compliance status is provided for each host.
- If you fail the assessment, you can view a list of detected vulnerabilities and potential vulnerabilities. This includes those that must be fixed to obtain compliance as well as vulnerabilities that we recommend you fix.
- Allows you to download PCI compliance reports in PDF to submit to your acquiring bank or to assist in remediation efforts.
